Tendencia de tiempos

En el siguiente gráfico se puede apreciar la tendencia de las distintas categorías de tiempo en los últimos 10 días.

A continuación una pequeña explicación de cada categoría:

Tiempo productivo:

Total de tiempo utilizado en operaciones laborales. Incluye el tiempo de las categorías Activo, Pausas de Salud y Tiempo Extra.

Tiempo no productivo:

Total de tiempo que muy posiblemente no fue utilizado en operaciones laborales. Incluye el tiempo de otras categorías como Tiempo de Interrupciones, Tiempo Ausente, y Tiempo Sospechoso. Tome en cuenta que durante el trabajo pueden existir procesos manuales que no se realizan a través de la computadora por ejemplo: Contestar llamadas, copiar documentos, e inclusive tiempos especiales como el tiempo de baño. Estos casos estarían incluídos dentro de esta categoría. Los puestos de oficina tienen un promedio de tiempo no productivo de 90 minutos por día (incluyendo tiempos de interrupciones, ausencias y tiempo sospechoso).

Tiempo sospechoso:

Esta categoría de tiempo solo incluye el tiempo consumido en aplicaciones o páginas web que la empresa previamente ha establecido que no tienen relación con las operaciones de trabajo. Un posible ejemplo de esta categoría sería visitar Netflix, YouTube o utilizar juegos de computadora. Es recomendable poner especial atención a esta categoría.

Tiempo ausente:

En esta categoría solamente se incluyen todas pausas donde la computadora ha permanecido inactiva por más de 5 minutos. En esta categoría podrían incluirse pausas de baño, reuniones, o inclusive llamadas telefónicas siempre que el usuario deje la computadora inactiva por más de 5 minutos. Desde un punto de vista estadístico, es común observar hasta 30 minutos de tiempo ausente por día en los puestos de oficina.

Tiempo de interrupciones:

Esta categoría incluye la suma de todas las pausas menores a 5 minutos. En ella podrían incluirse distracciones o pequeños procesos manuales como escanear documentos.

Total de la jornada:

Total de tiempo transcurrido entre el inicio de la jornada y el final de la jornada.

Tiempo extra:

Total de tiempo que se considera extra después de haber cumplido con una jornada laboral completa, este valor depende de la configuración establecida por la compañía. Ejemplo: En jornadas diurnas el tiempo extra suele contarse después de una jornada laboral completa de 8 horas. En jornadas nocturnas suele contarse después de una jornada completa de 6 horas.
